Burpee's Bulbs Grow

New Colors The joy and beauty of Spring Flowers are in the beautiful colors found in no other class of plants. Bulbs planted in the fall bloom the following spring and give a most gorgeous display, showing colors, shades and markings from blackish-purple to the purest white, as well as combinations of colors on the same flowers.

Attractive Showings Nearly all of the Bulbs listed in this book are at their best out-of-doors; planted among perennials or in front of shrubbery, the effect is very beautiful; in large beds by themselves, especially when one color is used; as borders or in individual plantings the results are always the same—a real show garden.

Early and Late The early spring flowers always have had the greatest appeal to gardeners. Almost before the snows are gone we find the Snowdrops, Crocus, Scillas and others in full bloom, rapidly followed by the Daffodils, Hyacinths and Tulips. Then through the summer we have the gorgeous Lilies. Beautiful flowers the entire season from early until late.

Every Bulb Top Size

And True to Name

New Varieties Many hundreds of new varieties of Bulbs are grown and carefully inspected on our Fordhook Trial Grounds every year, and only the finest are selected for offering our friends and customers. Our selections this year are unusually fine, and are offered at most reasonable prices. Go through our entire list carefully—you will surely find everything you want.

Unusual Styles Never before have we been able to present the splendid assortment of desirable new styles as now. Besides the always popular Parrot Tulips, we now offer the Butterfly and Globe Tulips (known as Calochortus), in their bright colors and forms; unusual Daffodils, Rock Garden Tulips, English Iris and others, many being pictured on inside front cover.

For House and Garden One should not forget the winter flowers when planning their Bulb Gardens. Many of our showiest outdoor flowers are fully as beautiful when grown inside. Many Daffodils, Tulips, Hyacinths and most of the smaller Bulbs may be planted and flowered inside, as well as the stately Lilies. See catalog for other fine varieties.

Burpee's Early Single Tulips

Top Sized Bulbs

Burpee's Tulip Bulbs are strictly **Top Size**—the finest that can be secured.

Do not buy small Bulbs—plant **Burpee's Top Size** for best results.

Belle Alliance

The early Tulips, by reason of their blooming season, which comes from 2 to 4 weeks ahead of other Tulips, have always been favorites for an early display in the garden. They are admirably adapted for beds and borders, and they are grown extensively for winter blooming in the house. 10 to 12 in. tall.

Outdoors: Plant the bulbs 6 in. apart, covering with 5 to 6 in. of soil, and, if possible, protect the planting against alternate freezing and thawing by lightly covering with pine boughs or straw. The object is to shade the ground and not to keep it warm.

In the House: For indoor blooming in pots and pans the Early Single Tulips are very much in demand. They make their best display if planted not less than 6 bulbs in a shallow pan, one variety to each pan, to be sure that they will bloom all at one time.

A Bed of Rose Luisante

Burpee's Early Double Tulips

Growing Early Double Tulips does not require any particular skill. They do well planted in pans for winter blooming in the house and last even longer than the Singles. They are ideal for outdoor bedding because they make a compact growth, and are, therefore, less subject to injury by winds. The varieties we list are all fully double and are highly appreciated because of their long blooming season. Their massive appearance suggests their use in formal beds particularly, or in borders where a bold color effect is wanted. For full cultural directions, ask for a free copy of the Burpee leaflet No. 31, "Bulbs for Winter and Spring Blooming."

9356 Crown of Gold

Yellow blooms, splashed with orange and red. This variety well heads our list as the yellow, orange and red colors adapt themselves to harmonious color schemes, using other colors and shades for contrast. 3 for 25¢; 12 for 75¢; 100 for \$5.50.

9358 Electra

9359 Fireglow

Rose-pink, flushed with white. In the garden among the shrubbery or perennials the large, delightfully colored flowers are always admired, while a pot of Peach Blossom in the house is very showy. 3 for 25¢; 12 for 75¢; 100 for \$5.50.

9370 Snowball

(Boule de Neige) Large Peony-like blooms of snow white. Pure white flowers are in vogue at present and we confidently recommend Snowball. 3 for 30¢; 12 for 90¢; 100 for \$6.50.

Tall Giant Breeder Tulips

Magnificent Large Blooms in Beautiful Art Shades

All Bulbs Top Size

Breeder Tulips are of the same tall, stately growth as Darwin, require the same culture, bloom at about the same time, but come in colors not found in that class or any other class of Tulips. Their rich and unusual blendings of purple and old gold, bronze and terra-cotta, brown and violet, buff and maroon, are most attractive. These so-called "art shades" put Breeders in a class by themselves. Enormous, graceful, showy blooms, many of them sweet scented. All are splendid for cutting and should be included in every garden display. They flower when the Single and Double Earlies are over. Heights given are average and for reference only.

May-Flowering or Old English Cottage Tulips

All Bulbs Top Size

Generally speaking, the most permanent of all Tulips, blooming in early May after the Early Singles have passed, hence the name of "May Flowering." The term "Cottage" is of recent origin and so called because so many were planted around the country homes and cottages of England. As a class they are rich in the more delicate and artistic shades of yellow, orange, fawn, salmon, old rose—colors missing to a great extent in other classes of late Tulips. They are as varied in their range of colorings as the Darwins but more varied in form, being mostly long and oval-shaped, many with gracefully reflexed petals. Stems are long and not so stiff as the Darwins or Breeders. Excellent for cutting and unsurpassed for garden decoration and especially for grouping among shrubbery. Except for a few varieties, they are not recommended for growing indoors but should be handled the same as Darwins. Average heights given are for reference only.

9209 Ada Finch Primrose-yellow; inside, base and anthers lemon-yellow. At times, flowers show slight traces of reddish pencillings. Very attractive; 27 inches. 3 for 45¢; 12 for \$1.60; 100 for \$11.00.

9202 Ambrosia Salmon-orange shaded bronze and lilac-rose; inside vivid orange changing to light tan as the flower ages; yellow base edged green. An interesting and very beautiful combination of colors that commands attention whenever seen; 24 inches. 3 for 25¢; 12 for 85¢; 100 for \$6.00.

9200 Arethusa Soft yellow shading almost to ivory in the center of each petal. Inside rich lemon-yellow. Large, well-formed, urn-shaped flowers of the true Cottage type. A new variety, greatly admired for its size, lovely form and fine erect stem; 27 inches. 3 for 30¢; 12 for 90¢; 100 for \$6.50.

Tall Giant Darwin Tulips

The chief characteristics of Darwin Tulips are the perfect cup-shaped flowers, fleshy petals, tall stems and bright colors—scarlet, crimson, rose, pink, violet, purple, slaty blues, blue-violet, lavender, white, and now a golden yellow.

Giant Fringed Fantasy

Beautiful Parrot Tulips

Parrot Tulips are most unusual, with their artistic and quaint form. The petals of the flowers are laciniated and attractively fringed, as shown in the picture. With the exception of Gemma and Fantasy, the flowers are borne on slender stems about 15 inches long. Gemma and Fantasy can be depended upon to produce a flower from every bulb planted, but in some sections and seasons, the other varieties listed very often do not produce a flower from every bulb planted. They are entirely distinct, however, and one of the most interesting plants you can grow.

9342 Giant Fringed Fantasy

A strong, upright grower, with bright geranium-red blooms edged cream-pink and shaded salmon-rose, with a much darker interior. Emerald green markings and spots give an added touch of color to this most attractive flower. 18 to 21 inches. 3 for 40¢; 12 for \$1.25; 100 for \$8.75.

Burpee's Showy Hyacinths

Royal
Scarlet

Hyacinths are easily grown out-of-doors in beds or borders. Plant the bulbs from 4 to 6 in. deep, according to the texture of the soil. Protect during the winter with a 3 in. layer of straw, leaves or coarse manure to prevent alternate freezing and thawing of the soil. This covering should be removed promptly with the first warm days of spring. Large beds of Hyacinths always make a fine showing.

Bedding Size Hyacinths

In naturalistic planting, size of the spike is not as important as in formal beds, and for that reason many gardeners prefer this size, which is guaranteed to bloom. These bulbs are ideal for planting in the foreground of shrubbery or in the perennial border.

- 9026 **Dr. Lieber** Lavender-blue, shaded violet. Dark blue effect.
 9003 **Duke of Westminster** Large spikes of purplish-blue.
 9070 **Enchantress** Closely set bells of light delft blue.
 9071 **Gertrude** Magnificent trusses of rich carmine-rose bells.
 9072 **Grand Maitre** Deep porcelain-blue of unusual appeal.
 9073 **King of the Blues** One of the best rich dark blues.
 9074 **Lady Derby** Strong and solid spikes of clear rose-pink.
 9022 **La Grandesse** Beautiful large bells of clear waxy white.
 9075 **La Victoire** Brilliant scarlet; one of the earliest to bloom.
 9076 **L'Innocence** Pure white; makes a beautiful display.

9001 Duke of Westminster

An Unusually Fine Selection of this Most Charming Flower

We confidently recommend Duke of Westminster as one of the finest Hyacinths grown today. The prevailing color is deep purplish blue with large spikes well filled with bells of rich purplish blue with a light center. Equally valuable for forcing and bedding.

9025 Dr. Lieber Lavender-blue, shaded violet, the general effect being deep blue. Large, compact spikes. One of the finest of the newer varieties, doing equally well in the garden as when forced. Blends nicely with any other color making a pleasing contrast.

9004 Enchantress A lovely variety with attractive long-stemmed flower-spikes. The individual bells are closely set on a strong stem. They are a beautiful light delft-blue shaded with somewhat deeper blue. Valuable for garden display and for forcing.

9006 Gertrude Magnificent compact trusses closely set with rich carmine-rose bells. This is the favorite variety for outdoor bedding because the plants make a splendid uniform growth and bloom all at one time. Easily forced.

9007 Grand Maitre A glorious spike of large bells closely set on a long and strong stem. The color is a rich deep porcelain-blue of unusual appeal. Grand Maitre is equally well suited for outdoor growing and for forcing.

9009 King of the Blues Those who admire rich deep shades will be particularly pleased with King of the Blues. It is, in our opinion, one of the best belonging to the deep blue class, with elegant, long and graceful spikes.

NARCISSUS or DAFFODILS

In a general way, Daffodil and Narcissus mean the same thing. Daffodil is the common name and Narcissus the botanical name. Common usage among garden makers in this country has applied the term Daffodil to the large trumpet varieties, while the smaller or medium trumpet, as well as the Cluster-flowered and Poet's types, are referred to as Narcissus. Botanically these are the Barrii, Incomparabilis, Leedsii, Poeticus, Poetaz, Polyanthus and Miniature types. There is a growing tendency, however, to use the name Daffodil.

As Narcissus bloom early, last a long time, and may be had in so many lovely varied forms, they have few equals as garden flowers. They are most desirable for naturalizing; ideal for cutting.

In descriptions we refer to the trumpet and perianth. The trumpet is the funnel-like center, while the perianth consists of the petals surrounding it. In the medium or short cupped classes we refer to cup or crown, which is really a miniature trumpet.

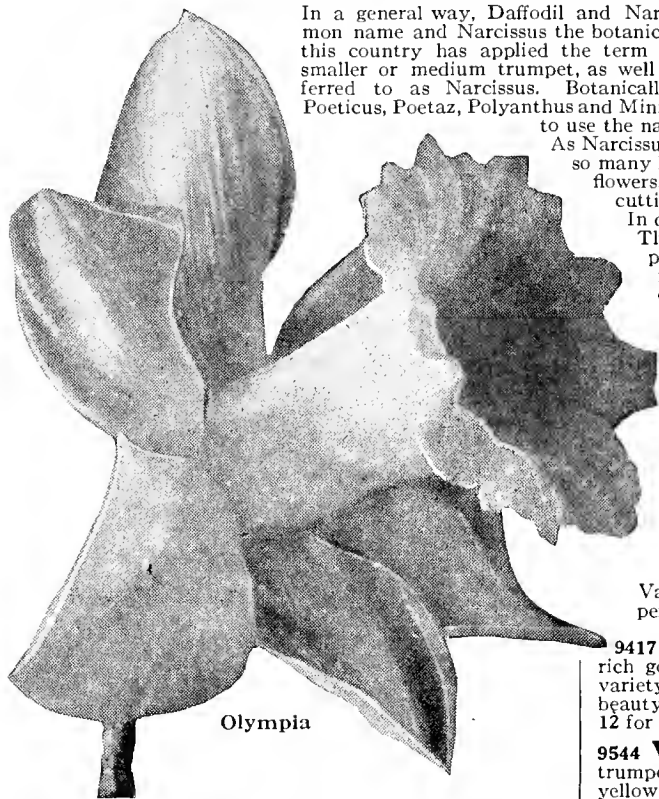

We are listing each class separately, offering the best varieties in each, and briefly describing their distinguishing characters, and in so doing hope it will help you to select the varieties you prefer.

Trumpets are as long as, or longer than, the perianth segments.

Jonquils and Campernelles

(*Narcissus Odorous*)

Jonquils and their hybrids have a grace and charm that make them extremely popular. The blooms are borne in clusters on top of a strong, tall stem. All are brightly colored and very decorative, as well as sweet-scented. They have long, grass-like foliage and belong to the rush-leaved variety of *Narcissus*. Some gardeners apply the name Jonquil to the large trumpet Daffodils, but this is misleading. The sweet fragrance of the Jonquils and Campernelles makes them very desirable for garden decoration and for cutting.

9468 Giganteus Campernelle The largest flowering of all Campernelles. Its clusters are composed of many rich yellow blooms. It flowers early and is easily grown indoors for early spring blooming. 3 for 30¢; 12 for 95¢; 100 for \$7.00.

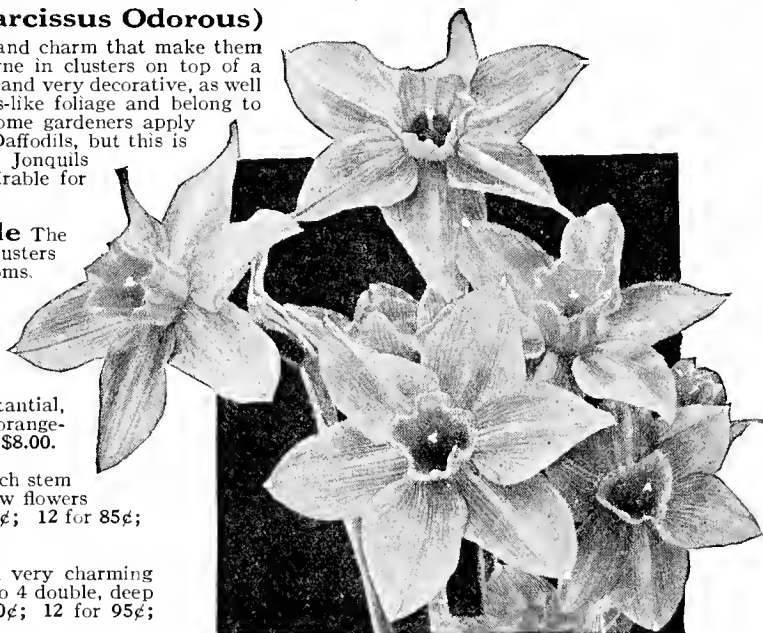

9469 Orange Queen Campernelle The individual flowers are large and well-formed. They are substantial, long stemmed and strong. Color is a rich orange-yellow. 3 for 35¢; 12 for \$1.15; 100 for \$8.00.

9463 Single Campernelle Each stem carries from 2 to 5 large, rich, deep yellow flowers which are delightfully fragrant. 3 for 25¢; 12 for 85¢; 100 for \$6.00.

9482 Double Campernelle A very charming variety, bearing on tall graceful stems 2 to 4 double, deep yellow flowers of elegant form. 3 for 30¢; 12 for 95¢; 100 for \$7.00.

9479 Single Jonquil (Simplex) The true single sweet-scented Jonquil of light, elegant growth. Blooms about May 15. Rich yellow flowers in clusters of 3 to 8. 3 for 30¢; 12 for 95¢; 100 for \$7.00.

9484 Gracilis Tenuior (Jonquil) Silvery white petals, tiny yellow cups; several florets on a stem. In old catalogs this variety was called "The Silver Jonquil." Charming dwarf variety, only 8-9 in. high. 25¢ each; 3 for 60¢; 12 for \$2.20; 100 for \$15.00.

Golden Sceptre

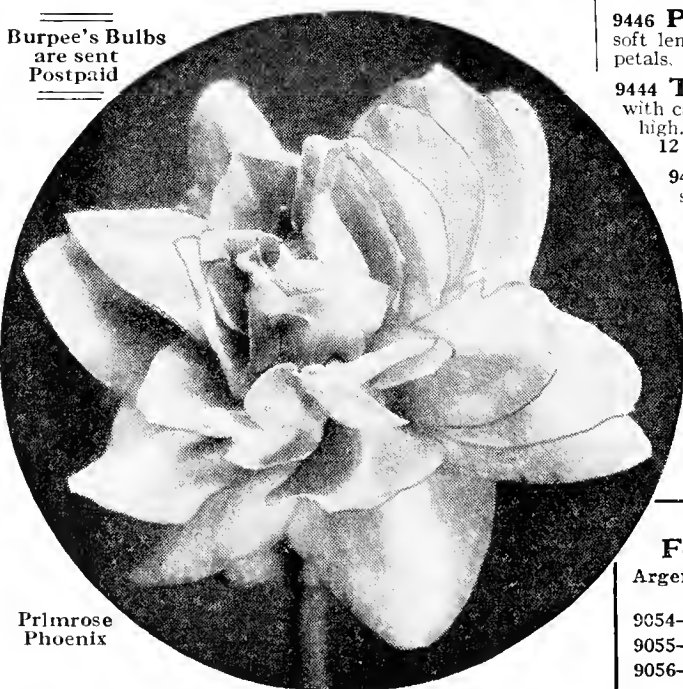

9483 Golden Sceptre (Jonquil) One of the finest of the new Jonquil Hybrids. A medium-sized, perfectly built flower of deep Jonquil-yellow. The perianth is star-shaped, just a shade lighter in color than the trumpet, which is slightly rolled and flaring at the brim. The whole flower is of good substance, lasting well both in the garden and when cut. 3 for 30¢; 12 for 95¢; 100 for \$7.00.

Double Narcissus or Daffodils

Quite showy flowers, double or semi-double, some made up with rows of petals of alternate colors, while others have large petals of one color interspersed with shorter petals of another color. Their attractiveness makes them valuable for garden decoration or cutting. Von Sion is the only variety we list which has a double trumpet surrounded by a single row of perianth segments. It is the true Old Dutch Daffodil.

9449 Argent Attractive, semi-double blooms with large, creamy white petals, shaded lemon-yellow in the center. Blooms profusely and makes a splendid display in the garden. 3 for 30¢; 12 for 95¢; 100 for \$7.00.

9443 Orange Phoenix Large, double flowers made up of rows of ivory-white petals which seem to be held in place by lacy ribbons of bright orange. 15¢ each; 3 for 35¢; 12 for \$1.15; 100 for \$8.00.

9446 Primrose Phoenix Lovely large double soft lemon-yellow rose-shaped blooms composed of broad petals. 15¢ each; 3 for 40¢; 12 for \$1.40; 100 for \$10.00.

9444 The Pearl Creamy white petals interspersed with canary-yellow ones. A dwarf little mite about 10 in. high. Wonderful for Rock Gardens. 15¢ each; 3 for 35¢; 12 for \$1.20; 100 for \$8.50.

9452 Twink Semi-double, the petals alternating soft primrose and clear orange, giving the flowers an attractive appearance. Quite early. 30¢ each; 3 for 85¢; 12 for \$3.00; 100 for \$22.00.

9445 Von Sion Golden yellow flowers with a double trumpet and a single perianth. In great favor for forcing, especially when several bulbs are planted in shallow pots. Prefers a cool soil and semi-shaded position outdoors, otherwise in some sections and locations the flowers are liable to become greenish-yellow. 3 for 30¢; 12 for 95¢; 100 for \$7.00.

9472 Double Mixed This mixture includes the above and a number of others which will give a good display in the garden. 3 for 25¢; 12 for 85¢; 100 for \$6.00.

9513 *Cyclamineus*

The earliest of all Daffodils and a charming, elegant little flower of very distinct form. Trumpet is rich yellow, straight and tube-like, elegantly serrated at mouth. Fine for edging or naturalizing in damp spots in the rock garden or in shady nooks. Lasts for years; 6 in. high. 35¢ each; 3 for 95¢; 12 for \$3.50; 100 for \$25.00.

9510 *Triandrus Hybrids* *Agnes Harvey*

9511 *Triandrus Hybrids* *Queen of Spain*

Flowers vary slightly in size, and sometimes in form of trumpet, but all are of a soft, delicate canary-yellow with a graceful reflexing perianth. 7 in. tall. 25¢ each; 3 for 70¢; 12 for \$2.50; 100 for \$18.00.

Polyanthus Narcissus

Fragrant White Narcissus

9460 *Paper White Grandiflora*

*The popular flower for growing in the house
either in soil or in pebbles and water*

The lovely pure white blooms are arranged in clusters of from 6 to 12 on each stem. Unexcelled for winter blooming in the house. Paper White Narcissus are grown indoors more easily than any other flower, which accounts for their universal popularity. They are not suited for garden planting. (Large bulbs.) 3 for 20¢; 12 for 60¢; 100 for \$4.00.

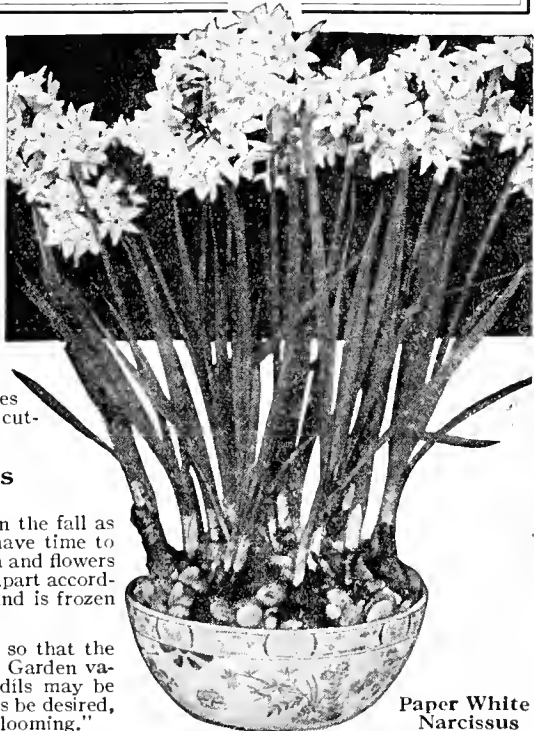

9459 *Soleil D'Or*

This often is called the "Yellow Paper White" Narcissus. It is as easily grown in water and pebbles as the variety offered above, but the blooms are an intense yellow with an orange-colored cup. Gives a magnificent display during winter and spring either in bowls or as cut-flowers. (Large bulbs.) 3 for 45¢; 12 for \$1.60; 100 for \$11.00.

How to Grow Narcissus and Daffodils and When to Plant Them

For the most satisfactory results, plant Narcissus Bulbs as early in the fall as they can be obtained, because if planted too late, they will not have time to produce sufficient root growth, which is essential to good top growth and flowers in the spring. The bulbs are planted 4 to 8 in. deep and 6 to 10 in. apart according to the size of the bulbs. In very cold locations, after the ground is frozen hard, cover with leaves, straw or coarse litter from 4 to 6 in. deep.

For house culture in flower-pots plant just close enough together so that the bulbs do not touch one another. With the exception of the Rock Garden varieties listed on this page, almost any of our Narcissus or Daffodils may be grown indoors as well as outside. Should further planting directions be desired, ask for our Free Leaflet No. 31—"Bulbs for Winter and Spring Blooming."

The First Flowers of Spring

The early spring flowers always have had a particular appeal to gardeners. Though they are not large, they seem to mean so much to us because they are the first ones. Plant them plentifully: Snowdrops, Scillas, and all the others listed on this and the following pages. Plant some Chionodoxa this year too. They make a splendid show, are hardy, and will last almost indefinitely. Fritillaria, Grape Hyacinths, and Scilla are seen far too seldom. We know you will like them. And be sure to include some of the newer Iris and Anemones.

Brodiaea

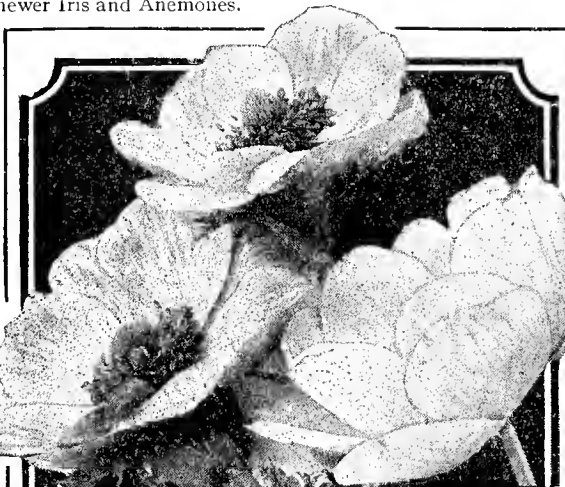

9497 Mixed Colors

Bulbs are small and produce grass-like leaves with flowers borne on long, slender stems. Flowers are produced in clusters, wax-like in texture, very pretty, and last well either on the plant or when cut. Grow 15 to 20 in. high. Do well in semi-shade or in the rock garden in crevices of rocks. Plant bulbs 2 to 3 in. deep. Must be protected in cold sections. 3 for 20¢; 12 for 70¢; 100 for \$4.75.

Perfectly hardy, bulbous plants, doing well under ordinary garden culture; excellent for naturalizing. Blooms in late May and June. The flower spikes grow 2 to 3 ft. high, bearing many star-shaped flowers 1½ in. across, which have some resemblance to Scillas but are much prettier. Shades of blue ranging from lavender-blue to aconite-blue. Plant 4 in. deep and 4 to 5 in. apart. Water liberally while growing. 3 for 35¢; 12 for \$1.15; 100 for \$8.00.

Chionodoxa

Glory of the Snow

(See colored illustration on Inside Front Cover.) Plant the bulbs 3 in. deep and 2 in. apart in various locations throughout the garden, particularly in the rockery. They will provide a showy display for many weeks if planted in different exposures.

9480 Luciliae

Deep blue flowers with a white center. This is a beautiful flower and showy wherever planted. Well-established bulbs furnish a number of flower spikes which carry 4 to 6 blooms each. 12 for 40¢; 100 for \$2.75; 1000 for \$22.50.

9481 Sardensis

Intense bright blue with a lighter eye. A delightful companion to above, which when planted together make a pleasing contrast. Flowers increase in size each year and should be planted in all rockeries and perennial gardens. 12 for 40¢; 100 for \$2.75; 1000 for \$22.50.

Burpee's Spring Flowering Crocus

Crocus will grow in many places—in the lawn, in flower borders, in rock gardens, edge of shrubs, on the slopes of terraces, in sun or shade, and even under trees. The best position is where they will receive the sun for only part of the day. For showy effect plant bulbs 3 to 4 in. apart, 2 in. deep. For mass effect in borders set bulbs in double rows 6 in. apart. Such ribbon plantings are very pretty and greatly admired.

Lovely bulbous plants flowering in late spring. These are best described under their separate groups: Mariposa and Globe Tulips.

Globe Tulips

Often referred to as Fairy Lanterns because of the shape of the flower and the way it droops on the stem. Plants are of branching habit and bear 5 to 25 flowers per stem in a season. The inside of the petals is hairy. Exquisitely tinted and borne on long, slender, leaf-wrapped stems. They are natives of woodlands, so should be planted in any friable soil mixed with plenty of leaf-mold. They like some shade but not full shade. Fine subjects to naturalize in the rock garden or in shaded woods, but they must have perfect drainage. Plant bulbs 3 to 4 in. deep, and 3 to 6 in. apart. A surface covering of several inches of leaves, after planting, should be given. Hardy almost everywhere; in very cold sections, provide protection over the winter.

9376 Albus White with some bronze and pinkish tingeing. A stylish flower of real beauty. 18 to 30 in. 3 for 30¢; 12 for 90¢; 100 for \$6.25.

9378 Amoenus Soft rose-pink. The softer colors and shades are very enchanting, and should be grown by all. 8 to 16 in. 3 for 30¢; 12 for 90¢; 100 for \$6.25.

8602 Harrisii

(Bermuda Easter Lily)

The Bermuda Easter Lily is the strongest of all the longiflorum lilies, which are commonly known as Japanese Easter Lilies. This variety is the one planted extensively for winter blooming and is forced in great quantities for Easter. The plants grow 4 ft. tall, carrying from 5 to 20 large, waxy white flowers on a single stem. The blooms have a delightful fragrance. The individual flowers measure 4 to 6 in. in length and are quite often tinged with green near the base. The anthers are yellow. In the warmer sections, planted in the open, they make a sturdy growth and bloom during July and early August. Ready for delivery in September. Large Bulbs, 30¢ each; 3 for 85¢; 12 for \$3.00; 100 for \$22.00.

8601 Harrisii

(Bermuda Easter Lily)

EXTRA LARGE SIZE BULBS

See illustration. These larger sized bulbs produce stronger plants, larger blooms, and more flowers to a stem than the size generally offered. Ours are genuine Bermuda Grown, personally inspected during growing season, and re-selected before sending to our customers. This added service insures your having the Best.

These Better and Larger Bulbs are used in large quantities by Florists for the finest Easter Blooms. They are too tender for outdoor planting where the winter temperatures drop below the freezing point. In warmer sections they are ideal garden subjects. For house blooming use a rich, porous soil. We suggest planting 1 bulb in a 5 or 6 in. pot, barely covering the bulb with soil. Keep in a cool, dark, airy place until bulbs are well-rooted.

After blooming in pots, the plants may be cut back, removed from pots and set in the open ground. Late summer blooms may be expected from the new growth. Bulbs ready in September. 50¢ each; 3 for \$1.40; 12 for \$5.00; 100 for \$37.50.

Formosum Easter Lily

8614 Formosum

(Japanese Easter Lily)

This is quite similar to the Bermuda Easter Lily and is best grown in the house. However, it does not make as tall a growth. It is also known as Japanese Easter Lily and Trumpet Lily. The plants grow 1 to 3 ft. in height and bear at the top a whorl of 1 to 10 flowers. The blooms are 4 to 6 in. long and nearly as wide. The waxy white corolla is relieved by a greenish tinge at the base and by the bright yellow anthers. The plants bloom profusely during July and early August. Ready for delivery Nov. 1. 40¢ each; 3 for \$1.10; 12 for \$4.00; 100 for \$30.00.

8612 Longiflorum giganteum fortunei

(Giant Easter Lily)

The largest of the Easter Lilies and an excellent variety in every way. The waxy white blooms are lightly tinged with green, presenting a pleasing blend of colors. Not so extensively used by Florists for Easter forcing as the others, but is easily grown in the house in pots for Easter, Decoration Day, or later flowering. It is well suited for growing out-of-doors in warmer climates, where it blooms in August and September. 1 to 3 ft. Ready in Nov. 35¢ each; 3 for 95¢; 12 for \$3.50; 100 for \$25.00.

Callas

These are easy to grow for winter blooming in the house. The bulbs require quite large pots filled with rich soil. Keep the plants fairly cool, say at about 40 to 50 degrees F., until they are wanted for blooming, when the temperature should be 10 degrees more.

8918 Golden Yellow (Elliottiana) A most attractive variety, with rich golden yellow flowers and variegated green and white foliage. Ready in Nov. 35¢ each; 3 for 95¢; 12 for \$3.50.

Perennial Flower Seeds

Perennials are the chief stand-by of the old-fashioned gardens. They require little attention and respond generously to increased care and thorough cultivation. After once being established they will not only last many years but also increase in beauty with every season. The seed of perennials may be sown outdoors almost any time of the year.

Summer and fall sowings should be made in specially prepared beds, preferably boxed in with 8- or 10-inch boards and covered with a screen of lath or wide-meshed burlap. During the winter a covering of leaves or strawy manure, after the frost has touched the foliage, is all the protection needed to carry the plants safely through the winter.
